MEET US AT FMB 2016

FMB – the supplier fair for mechanical engineering – is headed towards a record number of exhibitors once again this year: Over 500 companies are expected to attend the event, from global players to specialised, medium-sized niche suppliers. The steady growth of FMB is thus set to continue in the twelfth year of its existence.

The blend of enterprises is worthwhile since together they will be showcasing solutions along the entire process chain in the development of machines.

We will be among those presenting their products and innovations in Bad Salzuflen from 9-11 November, and you will have the opportunity to engage in face-to-face discussions with us. Discover our products and services within the framework of the event. We will help you to find ways to meet your specific requirements and challenges.

WE LOOK FORWARD TO WELCOMING
YOU AT THE FORTHCOMING FAIR!
