

## **FMB 2016**

9-11 November 2016 | Bad Salzuflen Exhibition Centre

## **PRESS INFORMATION**

PI05\_2016 FMB fully booked

Bad Salzuflen, 11.10.2016

### "Full house" before the start of the show – lively interest in FMB-SÜD **FMB – the supplier show for mechanical engineering 2016 is fully booked**

There are only a few more weeks until the start of the twelfth FMB - the supplier show for mechanical engineering, which will be staged at Bad Salzuflen Exhibition Centre from 9 to 11 November 2016. The show organiser is extremely satisfied regarding the number of exhibitors as the hall space available is (almost) fully booked. Christian Enßle, Portfolio Manager FMB at Clarion Events Deutschland GmbH: "The last available places are currently being allocated. Never before has the exhibition space been entirely filled up with exhibitors at such an early stage. We will be setting up a waiting list for any additional companies interested in exhibiting at the event."

By doing so, the FMB show has once again increased the size of its exhibition area. Although there is no change in the total area compared with last year, the sister show "FKT Anwendermesse Kunststofftechnik" (user fair for plastics engineering) is taking a break this year due to the "K 2016" show which is being held at virtually the same time. The space becoming available as a result will now be used by the additional exhibitors at FMB.

What does FMB 2016 have in store for the visitors? First of all, a visitor-friendly and compact trade show: The A2 motorway in close proximity to the Exhibition Centre makes it easier to get here, parking and admission are free of charge, and the focus at the fair stands is on personal discussions about projects, products and current trends in industry and mechanical engineering.

As usual, the exhibitors will cover the entire spectrum of the supply industry for mechanical and plant engineering – ranging from metalworking to assembly engineering, materials handling and automation technology, drive engineering, control engineering, electrical and industrial electronics through to services, for instance in the fields of design engineering, consulting and logistics. Well over 500 companies in total will be showcasing their products and services at FMB.

The trade show organiser is continuing with its preparations for FMB-SÜD at the same time, which will be making its début in Augsburg on 15 and 16 February 2017. Christian Enßle: "The number of bookings taken for this event is also more than satisfactory – which is hardly surprising since a similar trade show was requested by the exhibitors at FMB in the southern half of Germany, and the well-developed industrial infrastructure in the region is similar to that in East Westphalia-Lippe."
